PRODUCT DESCRIPTION

Lactoferrin is an iron-binding transport protein and is naturally occurring in milk.
Lactoferrin from cow's milk is not only used as substitute for breast milk, it is nowadays also used as novel food ingredient in dietary supplement products. Besides 200 mg of lactoferrin per daily ration, the LACTOFERRIN CAPSULES also contain micronised iron pyrophosphate and vitamin C. This particular combination forms an iron transport matrix cause vitamin C increases iron absorption.
Iron contributes to normal formation of red blood cells and haemoglobin, as well as a normal oxygen transport in the body. It also plays an important role in the reduction of tiredness and fatigue.

ADVANTAGES

- **Innovative food supplement for an effective iron absorption**
- **Iron supports formation of blood cells and oxygen transport**
- **Vitamin C helps reducing tiredness and fatigue**
- **Easy intake (daily ration = 2 capsules)**

UTILISATION

2 capsules daily as food supplement, preferably between meals.

Do not exceed recommended daily dose. Dietary supplements do not substitute for a balanced and varied diet and a healthy lifestyle. Keep out of the reach of small children.

INGREDIENTS

Lactoferrin (from cow's **milk**), plant-based capsule (E464), iron pyrophosphate, anti-caking agents (microcrystalline cellulose, silicic acid), ascorbic acid.

FLAVOUR/PACKAGING

Jar à 90 capsules (36 g, 45 portions)
